

REFRIGERATION COMPRESSOR - REBUILD & SERVICE

CAPABILITIES:

- INSPECTIONS
- OVERHAULS
- PREVENTATIVE MAINTENANCE
- PREDICTIVE MAINTENANCE
- LONG-TERM STORAGE PREPARATION
- COMPREHENSIVE PARTS INVENTORY
- LARGE COMPRESSOR INVENTORY
- 24 HOUR PARTS AND SERVICE SUPPORT
- TRAINING SEMINARS

FES supplies parts and services for the following refrigeration compressors:

FES G Series	Grasso Recip
FES L-C Series	York Recip
FES H-E Series	Sabroe Recip
FES H-E Howden	Vilter Recip
Hall	Carrier Recip
Mycom	Mycom Recip
Dunham Bush (Hartford)	Trane Recip
Fuller Rotary	Hasegawa Recip
Frick	Thermatrol Recip
Kobe	

GEA FES, Inc. operates a comprehensive, competitively priced, compressor service program encompassing repair, remanufacturing, inspection and inventory.

GEA FES, Inc. employs a team of experienced factory trained service and rebuild technicians based in York, PA; Stockton, CA; Houston, TX; Montgomery, AL; Springdale, AR; and Miami, FL (marine service).

GEA FES' facilities are staffed and equipped to repair or completely rebuild rotary vane, reciprocating or screw compressors regardless of manufacturer.

NEW BARE COMPRESSORS

GEA FES, Inc. maintains a vast inventory of new compressors for use on FES packages, as well as for bare unit sales to replace worn-out compressors on packages in the field. Compressors are shipped the same day, depending on any required modifications. All bare replacement screw compressors are supplied with engineering drawings indicating the proper tubing, piping, and electrical connections for installation ease, and to minimize costly downtime.

REMANUFACTURED COMPRESSORS

Compressors often reach a point where they are beyond economical field repair. However, in many cases, some parts of the unit are salvageable. FES obtains “worn-out” compressors, disassembles and rebuilds them to like new condition, meeting or exceeding the original compressor specifications and tolerances using FES engineered parts. These remanufactured compressors - complete with a full one year warranty - provide an attractive alternative to new bare compressors, when financial constraints or the remaining useful life of the other package components, may not warrant a new compressor.

WE'LL PAY **CASH** FOR YOUR COMPRESSOR. . .

In order to maintain a sufficient inventory of remanufactured compressors, FES will purchase used compressors and rebuild them. We can offer a credit toward purchase or a straight buy. In addition, FES will bid to purchase compressors that are being taken out of service for a variety of reasons.

Contact your FES Sales Representative or any of the compressor rebuild facilities for pricing, trade-in's or general technical questions.
